

ARCHITECTURAL METAL

MILGO/BUFKIN

Building Exteriors

We fabricate curtain walls, entrances, revolving door drums, corporate logos and signs, canopies, light fixtures and other components for building exteriors.

Special Entrances

We have manufactured some of the most notable building fronts and facades, entrances and lobby interiors in the United States.

Canopies

Traditional and modern entrance canopies are fabricated in a variety of metals to any specification. We also restore canopies and entry ways.

Column Covers

Stock and custom column covers are available in any size, metal and finish. All are precision engineered for quick and easy installation.

Commercial Interiors

Special effects in lobbies and other interiors are attained with a wide array of metals and finishes for columns, wall and ceiling panels, light fixtures, frames for glass and stone, trim and more.

Ceilings

Advanced ceiling systems, stock and custom designed that can work in any space, are available in every metal and finish.

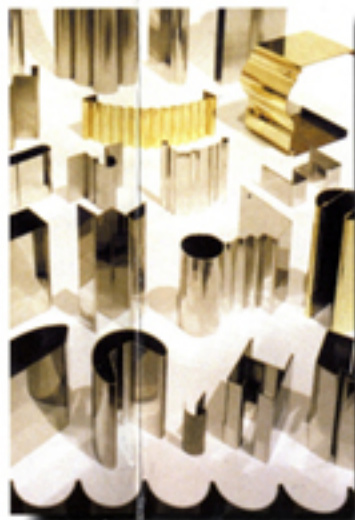

Sculpture & Logos

Our sculpture and corporate logos can be seen in museums and public spaces throughout the world. We help to realize the creative dreams of today's renowned artists, designers and architects.

Furniture & Design

We build custom furniture and furniture components using fine craftsmanship and the latest technologies for the highest quality at competitive prices.

Bent Shapes

We bend an infinite variety of metal shapes for hundreds of applications, including shapes which stretch the limits of what is possible.

Laser and Waterjet Cutting

Laser and waterjet cutters prepare metal, glass, stone, and other materials quickly with intricate shapes and finished edges for direct use and for additional forming.

Engineering and CAD Services

MILGO/BUFKIN's experienced engineering and CAD staff transform customers' designs into files ready for fabrication. We can manufacture directly from customers' approved shop drawings or we can work from free-hand sketches.

Laser and Waterjet Cutting

MILGO/BUFKIN's computerized laser, one of the largest and most sophisticated in the country, will cut metal, wood, plastic, and paper up to 5/8 inch thick in intricate shapes with an accuracy of 1/1000 inch. It cuts with such precision that usually no additional finishing is required. Our computerized waterjet is as accurate as the laser in cutting complex shapes, and can cut metal, glass, stone and just about any other material up to an amazing 9 inches thick.

Press Brake Bending

Our craftspeople with decades of collective experience bend metal into the most complex shapes and profiles. We have six press breaks, including one of the largest in the country.

Architectural Metal by MILGO/BUFKIN

MILGO/BUFKIN is one of the foremost fabricators of custom architectural metalwork. Our state-of-the-art technology and old-world craftsmanship transform stainless steel, steel, aluminum, bronze, titanium and other metals in a variety of finishes into objects of beauty and utility.

Metal by MILGO/BUFKIN can be seen in the most recognized buildings in New York and other major cities around the world.

MILGO/BUFKIN manufactures to customer specification. We utilize the latest computers for design and fabrication, the largest press breaks and metal cutting shears in the country, laser and waterjet cutters, punches and precision welding equipment. In the skilled hands of our experienced craftspeople, everything in metal is possible, from massive curtain wall components for the world's tallest buildings, to decorative metal for lobbies, to fine sculpture, to intricate jewelry.

Whether you are an architect, designer, contractor, artist or building owner, we will work with you to make your project on time, on budget, and to your exact specifications. We take pride in our workmanship. We specialize in unique projects and can accommodate large production runs as well as individual prototypes. We ship anywhere in the world.
